Safety. Protection. Prevention.

DID YOU KNOW?

- 50L Diesel theft per week can add up to a R33k loss per year
- TankSafe have sold over 1,5 Million units worldwide
- TankSafe® has a 3-year warranty

500 SERIES

A TankSafe® Security Solution for

TankSafe® 'Shield'

Best In Class Diesel Anti-Siphon Solution

The Shield range is recommended for Medium and Heavy Trucks with tank sizes <400L, plant equipment and refrigerated trailers. Best Suited to fuel tanks with an elongated neck.

HINO 500 Series fits the TISS16 Shield.

How It Works

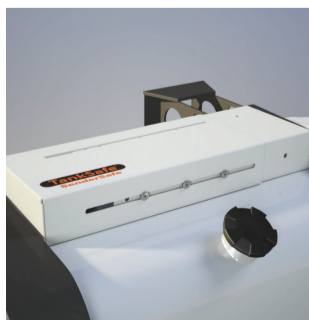

Without protection, a dishonest employee can currently skim 10-25l of diesel between fills, with very little chance of being detected.

TankSafe® is fitted to the existing tank neck and restricts the amount of fuel that can be skimmed from inside the anti-siphon chamber. This is largely thanks to its short neck and solid aluminium dome base, leaving only a minimal amount of fuel exposed.

Benefits

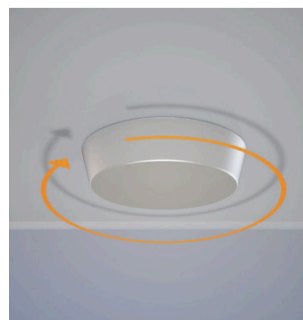

- Compatible with the OEM diesel cap.
- Robust device will withstand attack, equipped with a 4cm thick patented solid dome base.
- Narrow flow apertures and dome base prevent siphoning tubes from bypassing the device.
- Quick filling (tested at 100 lpm), the patented dome base does not impact diesel re-fueling rate.
- 3 year Manufacturers Warranty.
- Designed for quick and easy DIY fitment.
- Maintenance free, with no ongoing monthly costs.
- Competitively priced solution.

Secondary Devices

SenderSafe®

- Prevents tampering or removal of the fuel sender and pipes.
- Produced from 304 Stainless Steel.
- Fits under tank straps.

DrainSafe®

- Prevents unauthorised draining of the fuel tank.
- Anti-tamper bolt replaces the original drain plug/block off.
- Requires a special security tool to unscrew the bolt (tool sold separately).
