

# Stop diesel theft with

## DID YOU KNOW?

- 50L Diesel theft per week can add up to a R33k loss per year
- TankSafe have sold over 1,5 Million units worldwide
- TankSafe® has a 3-year warranty

700 SERIES

## A TankSafe® Security Solution for

### TankSafe® 'Optimum'

#### Best In Class Diesel Anti-Siphon Solution

Optimum is recommended for Heavy and Extra Heavy trucks that fill more than 4000L per month and tank sizes > 200L.

**HINO 700 Series fits the TISS 520 Optimum.**

#### How It Works

Without protection, a dishonest employee can currently skim 10-25l of diesel between fills, with very little chance of being detected.

**TankSafe®** is fitted to the existing tank neck. A unique float-valve allows fuel to flow into the tank during the filling process and then 'locks' the tank once filling is complete. The pressure of the flowing fuel pushes the float ball down while it enters. However, when filling is complete, the float ball rises up to lock off the tank. In this way, no fuel can be siphoned, not even the top few centimetres. The float-valve lock process also prevents overfilling and spills, which alleviates a lot of Health & Safety as well as environmental concerns.

#### Benefits

- Compatible with the OEM diesel cap.
- 100% protection from fuel siphonage.
- 100% protection from fuel skimming.
- Prevents overfilling and therefore wastage.
- Tamper proof protection for the float-valve.
- Fast filling security device (tested up to 140 litres per minute).
- Designed for quick and easy DIY fitment.
- Maintenance free, with no ongoing monthly costs.
- 3 year Manufacturers Warranty.

#### Secondary Devices

#### SenderSafe®

- Prevents tampering or removal of the fuel sender and pipes.
- Produced from 304 Stainless Steel.
- Fits under tank straps.

#### DrainSafe®

- Prevents unauthorised draining of the fuel tank.
- Anti-tamper bolt replaces the original drain plug/block off.
- Requires a special security tool to unscrew the bolt (tool sold separately).
